

Heatmap visualization showing the relationship between c (x-axis) and an unlabeled variable (y-axis). The color scale ranges from red (high) to yellow (low). The heatmap shows a general trend of decreasing values from top to bottom and from left to right.

Heatmap showing the relationship between c (x-axis) and α (y-axis). The color scale ranges from red (high) to yellow (low). The heatmap shows a general trend of decreasing values as α increases, with some local variations.
